OBJECTIVE

Optimal Control and Robot Learning. My goal is to build a broad-sense control framework for robotic systems that exceeds biological behavior, inspired and enhanced by model-based and learning-based methods.

EDUCATION

University of Seoul Mar 2022 – Aug 2027 (Expected)
B.E. in Electrical and Computer Engineering, Minor in Mathematics Seoul, South Korea

EXPERIENCE

Drone Researcher at Institute of Innovation for Future Army, ROKA Jan 2025 – Jul 2026
Compulsory Military Service Daejeon, South Korea
AI Lead Engineer at InBody AI Scale Team, InBody Jan 2024 – Jan 2025
Seoul, South Korea
Fifteenth Lead Researcher at Control and Dynamic Systems Lab, UOS Jan 2023 – Dec 2024
Advisor: Prof. Gyunghoon Park Seoul, South Korea

PROJECTS

- **Robot manipulation automating cable assembly and wiring** Nov 2025 – Present
AI for Industry Challenge Mountain View, USA
- **Autonomous air purifying robot agent** Aug 2025 – Sep 2026
4th Place (200 teams) — SK NAMUH X A1: Autonomous Driving Path Optimization (\$2,200) Seoul, South Korea
Independently implemented full-stack autonomous navigation purely in NumPy, entirely without open-source code, covering MCL, MPPI, and Traveling Salesman Problem.
- **Autonomous racing "Fifteenth"** Mar 2024 – Dec 2024
5th Place (12 teams) — 22nd Fifteenth Autonomous Grand Prix at CDC 2024 Milan, Italy
Led the project with 2 undergraduates and implemented a full-stack physical autonomous navigation system for racing completely from scratch, covering SLAM, MCL, Trajectory Opt, MPPI.
- **Cart pole system design and control by PID and NMPC** Jul 2024 – Sep 2024
3rd Place (25 teams) — UOS ECE Innovation Fair (\$220) Seoul, South Korea
Independently developed a physical Cart-Pole system for \$272, covering modeling, motor control, sensor integration, state estimation, embedded systems, and MPC.
- **New fully-automated body composition analyzer "InBody AI Scale"** Jan 2024 – Jan 2025
Consumer Electronic Show 2025 Las Vegas, USA
Developed height estimation model (accuracy 99.4%) and face recognition system of "InBody AI Scale".
- **ECG-based cardiovascular diagnosis device using ML** Jul 2023 – Jul 2023
3rd Place (12 teams) — InBody Hackathon 2023 (\$1450) Seoul, South Korea
- **Autonomous mobile robot for executing missions** Jul 2023 – Jul 2023
3rd Place (20 teams) — AI Object Detection-Based Solar Tracking Robot Challenge (\$220) Seoul, South Korea
- **Dating app "Sidaeting"** Mar 7 2022 – Jun 31 2022
1,700 User Base Seoul, South Korea
Developed the app's frontend of "Sidaeting," a dating service launched by UOSLIFE.

SKILLS

- **Languages:** Korean, English
- **Technical Languages:** C, C++, Java, JavaScript, Julia, Python, SQL, HTML, CSS
- **Technical Frameworks:** ROS1-2 (Melodic, Noetic, Foxy, Humble, Jazzy), MuJoCo, PyTorch
